

# ROUND STONES

Round Stones are loose crystal elements. Most of them are pointed on the reverse side, making them easy to apply in either pre set cavities or metal claw settings. The assortment features different cuts and a wide variety of sizes, the most innovative being the XIRIUS Chaton and the smallest being the XERO Chaton. The science of the cut and the celebration of crystal as high art come together in the XIRIUS Chaton, Swarovski's most brilliant crystal component ever.

Merging a gemstone like cut with rich, varied color and Platinum<sup>PRO</sup> colored foiling for exceptional durability, XIRIUS takes crystal one step closer to the diamond.
